

## Table 4.2 – Scoring Worksheet (page 65)

Please use the following in place of the scoring worksheet found on page 65 in the AP Macroeconomics 2000 Released Exam. The worksheet found within the printed book itself should not be used because beginning with the May 2011 administration of AP Exams, the method for scoring the multiple-choice section has changed. Beginning in 2011, total scores on the multiple-choice section are based on the number of questions answered correctly. Points are no longer deducted for incorrect answers and, as always, no points are awarded for unanswered questions.

### Section I: Multiple-Choice

$$\frac{\text{Number Correct (out of 59)}}{\text{Multiple-Choice Score}} \times 1.0169 = \frac{\text{Weighted Section I Score (Do not round)}}{\text{Multiple-Choice Score}}$$

### Section II: Free Response

Question 1	_____	X	1.5000 =	_____
	(out of 10)			(Do not round)
Question 2	_____	X	1.8750 =	_____
	(out of 4)			(Do not round)
Question 3	_____	X	1.0714 =	_____
	(out of 7)			(Do not round)

<b>AP Score Conversion Chart Macroeconomics</b>	
Composite Score Range	AP Score
72 - 90	5
58 - 71	4
50 - 57	3
36 - 49	2
0 - 35	1

$$\text{Sum} = \frac{\text{Weighted Section II Score (Do not round)}}{\text{Weighted Section II Score}}$$

$$\text{Composite Score} = \frac{\text{Weighted Section I Score}}{\text{Weighted Section I Score}} + \frac{\text{Weighted Section II Score}}{\text{Weighted Section II Score}} = \frac{\text{Composite Score (Round to nearest whole number)}}{\text{Composite Score}}$$

### Table 4.4—Section I Scores and AP Scores (page 66)

Due to the changes in multiple-choice scoring, the range of scores in Table 4.4 have changed, though the percentages remain the same. Please find the revised range of multiple-choice scores in the table below.

For a given range of multiple-choice scores, this table shows the percentage of students receiving each AP score. If you have calculated the multiple-choice score (**Weighted Section I Score**) by using the formula shown in Table 4.2, you can use this table to figure out the most likely score that the student would receive based only on that multiple-choice score.

Multiple-Choice Score	AP Score					Total
	1	2	3	4	5	
51 to 60	0.0%	0.0%	0.0%	15.9%	84.1%	13.4%
42 to 50	0.0%	0.3%	12.7%	76.6%	10.4%	30.3%
37 to 41	0.0%	19.8%	60.8%	19.4%	0.0%	16.5%
27 to 36	7.1%	80.0%	12.6%	0.3%	0.0%	23.6%
0 to 26	88.8%	11.2%	0.0%	0.0%	0.0%	16.2%
Total	16.1%	24.1%	16.8%	28.6%	14.4%	100.0%

### How AP Scores Are Determined (page 64): A Change to How the Score on Section I is Calculated

The information on how AP scores are determined have remained largely unchanged. The only portion that has changed is step one, described on page 64, which indicates how the score on Section I is calculated. Points are not deducted for incorrect answers in the multiple-choice section. The weighted maximum possible score on Section I is 60 points, and it accounts for two-thirds of the maximum composite score.

NOTE: Please refer to the printed book for a full explanation of how AP scores are determined, including a detailed description of all the steps in the process of calculating the composite score and converting it to an AP score.
